The Product Purchase report provides an itemization of purchases from each of your vendors, and it can be used to evaluate product purchases by vendor, item, or branch. It displays the amount of each purchase within a specified range of months of the fiscal year.

Product purchases can be reported for a specific day or over the past few years, depending on the amount of history you have retained. You could also evaluate the price of an item or group of items purchased during a particular period. The Product Purchase report can be generated in either summary or detail.
