=====							

The report created by Print and Post Distribution to GL displays the debit and credit transactions to be posted from Bank Book to General Ledger. It itemizes all of the debit and credit transactions to be posted and provides a total for each account reported. A summary recap of the total distribution of debits and credits is provided at the end of the report.

Within the categories that group similar Bank Book transactions, the report displays the home equivalent amounts to be posted to each applicable ledger account. A recap appears at the end of the report displaying the home equivalent amounts by account number.

### Features

- ① The Bank Book distribution report displays gain or loss on account balance in home currency equivalent in the Debit column under the Currency Loss/Gain heading.
- ② The Currency Loss/Gain section of the report also shows realized gains/losses and buy/sell rate conversion discrepancies of transactions by currency.
- ③ The Credit column of the Bank Book distribution report displays the cash balance of the natural currency account in home currency equivalent.
