The Planning report is a worksheet that can be used to review the inventory cost and replacement value, and can be used to monitor the revenue potential of your current on-hand inventory. This report can assist you in making decisions regarding management of your inventory through marketing and sales.

This report can be used as a tool to:

- change the pricing structure
- prepare for an upcoming sale
- offer discounts on inventory items
- file an insurance claim for inventory damaged in a warehouse
- review current and obsolete inventory
- review current oversold inventory

- compare minimum inventory value against current inventory value.
