The Period Summary report provides an analysis of the quantities or value of your inventory by selected transaction types. This report also includes information posted to Inventory from other Platinum modules. Quantities, amounts, or both can be reported either for individual months or for ranges of months (such as quarters), ranging up to 13 periods in the current fiscal year.

Many different Period Summary reports can be produced by varying the periods and quantities being reported, and the ranges of items, locations, and classes.
